ABOUT ME

I am a frontend developer who is purpose driven, focused and self-oriented. I am actively seeking out new technologies and staying up to date with the latest and advanced technology. I am self-motivating, I derive joy in learning, understanding new things and delivering high-quality products on a timely schedule.

My core strengths are converting design to code and making it responsive across different devices using HTML, CSS, Javascript and Vue.

TECH SKILLS

- HTML
- CSS
- JavaScript
- Git(Github & Bitbucket)
- Bootstrap, MD Bootstrap
- Vue

EXPERIENCE

SilverLine Computer, Rivers State — *Typist*

June - August 2018

I typed and printed out requested documents for customers and companies .

FlutureTech, Lagos — *Frontend Developer*

August - November, 2017

I implement requested templates using JavaScript, HTML and CSS. I also made changes to the already existent websites making it responsive across different devices.

ExolveTechnologies, Lagos — *Web developer intern*

January - August, 2017

I implement basic functional software using HTML, CSS, Javascript, collaborate with designers to bring products to life and update existing websites.
